A scatter plot on a white background with a light gray grid. The plot contains two sets of data points: red and blue. The red points are primarily located in the upper half of the image, forming a horizontal line near the top edge and several smaller clusters. The blue points are primarily located in the lower half, forming a horizontal line near the bottom edge and several smaller clusters. The two sets of points are well-separated, with very little overlap between them. The grid consists of major lines every 10 units on both the x and y axes, and minor lines every 1 unit. The x-axis ranges from 0 to 100, and the y-axis ranges from 0 to 100.

## Incremento ricoveri TERAPIA INTENSIVA
